Section 1: General Information

There are 2 versions of the *Kodak Carousel* 4000 and 5000 PROJECTORS. The PROJECTOR names and numbers are the same, but many parts are different. It is important to determine the correct version of the PROJECTOR before you start to repair it.

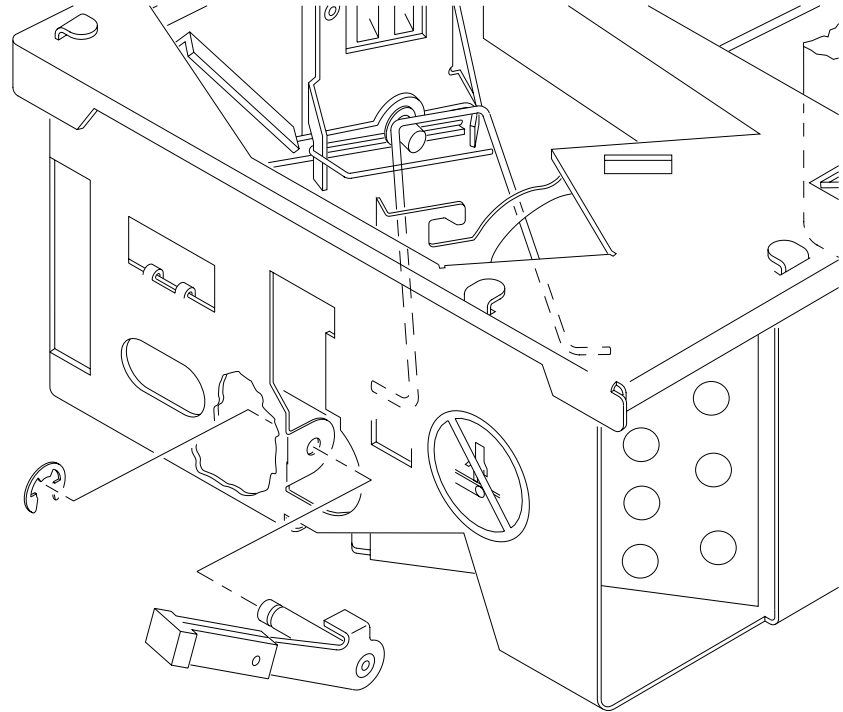

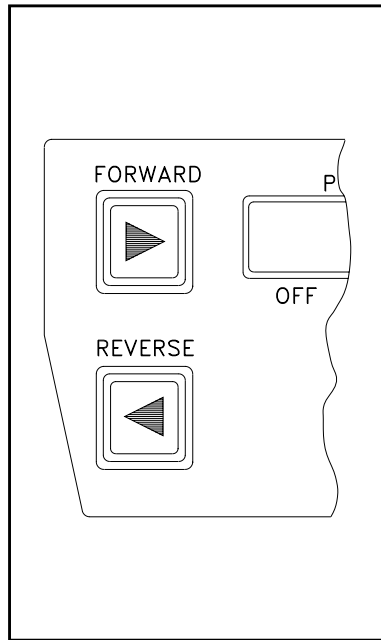

In the original version PROJECTORS, paint was applied to the HOUSINGS to obtain the correct color. The new version PROJECTORS have HOUSINGS made from plastic of the correct color. The new versions are identified as no paint, not painted, or non-painted PROJECTORS.

If a part is used only in an non-painted PROJECTOR, it is labeled as a non-painted part, for example, FAN SHAFT AY, non-painted - 254759. If a part is used in all of the original version PROJECTORS, or it is used in both the original and new versions, it will not be labeled; for example, FAN CAP - 232729.

The 3 main differences that are displayed between the Style I and non-painted version PROJECTORS are the LAMP BRACKET AY, CYCLE BUTTONS, and the type of SCREWS used in the BOTTOM HOUSING. Non-Painted PROJECTORS use *Torx* SCREWS, painted PROJECTORS use *Phillips* SCREWS. See the examples on the next page.
