Section 1: Introduction

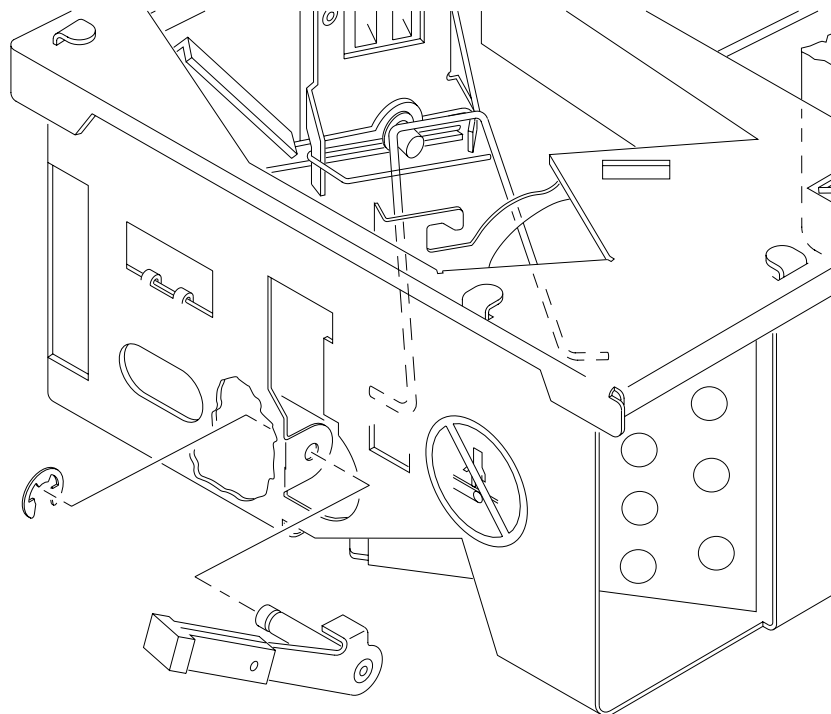

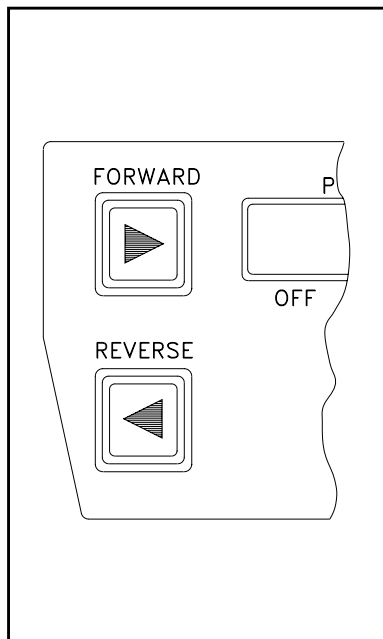

There are 2 versions of the *Kodak Ektagraphic* III PROJECTORS. The PROJECTOR names and numbers are the same, but many parts are different. It is important to determine the correct version of the PROJECTOR before you start to repair it.

Individual parts in the parts list are labeled. If a part is used only in a non-painted PROJECTOR, it is labeled as a non-painted part; for example, FAN SHAFT AY, Non-Painted - 254759. If a part is used in all of the original version PROJECTORS, or it is used in both the original and new versions, it will not be labeled; for example, FAN CAP - 232729.

The 3 main visible differences between the style I and non-Painted version PROJECTORS are the LAMP BRACKET AY, CYCLE BUTTONS, and the type of SCREWS used in the BOTTOM HOUSING. Non-painted PROJECTORS use *Torx* SCREWS, Painted PROJECTORS use *Phillips* SCREWS. See the following examples.
