CAROUSEL TRANSVUE 140 Slide Tray	184 0768
Universal Slide Tray Model AV780	144 3266

Remote Control Cable

■ General

Cable Remote	1	1	1	1
CAT 131 7015 -EC1				
CAT 131 7031 -EC2				
CAT 131 7056 -EC3				
Extension Cable 8 m				
CAT 140 1363		1	2	3
Total Cable Length	3.7 m	11.3 m	18.9 m	26.5 m

Remote Control Infrared

■ General

Note

Individual control of two IR systems in one room is not possible. Hand transmitter offers only one channel for transmitting data.

Note

Dimmed fluorescent light (neon) may reduce max. achievable IR distance!

An IR Control System always consists of a transmitter and a receiver!

Remote Control IR + Extension Cable

- 1 Ektalite Projector, IR Remote Control and 7.6 m Extension Cable for optimal placement of IR Receiver

Compliments of:
www.KodakParts.com

Parallel Projection IR and 2 Receivers

■ IR Remote System and a second receiver

Note

Parallel projection (side by side projection, projection in harmony) is only possible with a second IR receiver. Unfortunately this item is not available as an accessory. So a second IR remote system is necessary.

Compliments of:
www.KodakParts.com

Endless Projection Timer

■ Integrated Timer

Setting : 3 - 22 sec

■ **Important Note for use of Autofocus**

EKTAGRAPHIC
A, ATS, AMT, ABR

Important

Use **either** glass or glassless (cardboards)
mounted slides! **Never mix up!**

Compliments of:
www.KodakParts.com

Slide Recording

■ Creating 35 mm slides with film recorders

Lamps

General

	CAT No
EXR	82V 300W 35h 145 2259
FHS	82V 300W 70h 147 7678
EXY	82V 250W 200h 145 2143

Compliments of:
www.KodakParts.com

Extra Bright Lamp Module

General

■ How it works

All current Kodak Slide Projectors are equipped with the Extra Bright Lamp Module offering 30% more light than compared to former models:

- ✓ **more light**
- ✓ **more brilliant colors**
- ✓ **higher contrast**
- ✓ **better legibility**

According to a new cold light mirror the biggest part of the IR (heat) light will be absorbed and not reflected. Therefore the heatfilter could be removed (see illustration). This system is unique to Kodak.

Extra Bright Lamp Module

Lumen Output/ Compatibility

■ Lumen output for *standard and economy* setting

■ Upgrade

All former Ektalite Projectors can be upgraded with the Extra Bright Lamp Module:

Extra Bright Lamp Modules	CAT NO
Ektagraphic (dark beige color, new)	121 7626
Ektagraphic (blue gray color, old design)	139 3982
Ektalite	816 7181
Ektapro Single (models 3020 and lower)	718 3379
Ektapro Dual (models 4010 and higher)	718 4369

Compliments of:
www.KodakParts.com

Extra Bright Lamp Module

Safety Precautions

According to a temperature increase in the slide gate which, therefore, needs more careful handling when using slides, mounts and lamps.

With the higher light output of the Extra Bright Lamp Module the temperature in the slide gate rises. To enable a smooth operation following hints should be considered:

- ✓ Use **only light** respectively **light gray** slide mounts (e.g. Wess slide mounts). Slide mounts with only one dark side or black side have to be sorted in respectively, mounted with the side facing the lamp. Please pay special attention when sorting your slide mounts in rear projections:

- ✓ Do not use a lamp type EXW/15 h for the projector (higher temperature - lamp not available from Kodak).
- ✓ Consider the room temperature! It may not exceed 35 degrees C!

If these hints are not considered, mounts may deform!

Compliments of:
www.KodakParts.com

Stackloader

General

For a quick inspection of a stack of slides without the need to arrange them beforehand in a tray. A stack of thin glassless slides is loaded directly in the Stack Loader. Use the transport forward button to project the slides.

All EKTAGRAPHIC models

CAT No 151 4249
